ACKNOWLEDGEMENT

We would like to give our sincere acknowledgement to everybody responsible for the successful completion of our project “UNIVERSITY STUDENT MANAGEMENT SYSTEM”

The success and final outcome of this project required a lot of guidance and assistance from many people and we are extremely privileged to have got this all along the completion of this project.

We owe our deep gratitude to our project guide Prof. Roshni M. Raval, who took been interest on our project work and guided us all along till the completion of our project work by providing all the necessary help for developing a good Database System.

We would also like to thank all our lecturers.

Finally we convey our acknowledgement to all our friends and family members who directly or indirectly associated with us in the successful completion of the project. We thank one and all.

Thanking You,
Modh Dishant (IT-070)
Panchal Jay (IT-079)

1.SYSTEM OVERVIEW

1.1 CURRENT SYSTEM

University Student Management System is engineered to effectively administer every aspect of a University\College Student problem which they face while entering into new University\College at any unknown place.

Any Student who enters into new University/College they face some basic and huge problem like Finding PG\Hostel, Senior Contact for some notes, College Book's for reading or if they want to buy them, and also for eating it will show restaurants.

It will also show the different type of Activity organised by his/her particular University/College and it also show the different Event's occurring in his/her University/College.

1.2 OBJECTIVES OF THE PROPOSED SYSTEM

- Students can easily find Broker's for their Living, can easily get information for nearby restaurant for their Eating.
- Getting contact of their Senior form which, they can get help.
- They can contact their Activity Head easily.

1.3 ADVANTAGES OF STUDENT MANAGEMENT SYSTEM

- Through this system we try to achieve the below objectives
- To help students by providing study material from their seniors
- Students can know all the available restaurants and caters for their breakfast, lunch and dinner.

- Students can explore their interest by doing activities
- Students can find rent house or hostel easily.
- Students can also get their second-hand study material help easily.
- Also, they find Stationery and Xerox stuff easily.
- By using this system students can easily figure out which stationary or restaurants or Hostels are good for them, facility wise as well as price wise.

5.3 Queries

5.3.1 Give the name of the Restaurant which start earliest at morning.

✓ `SELECT * FROM `resturant` WHERE `Re_Timing_Start`=(SELECT MIN(Re_Timing_Start) FROM `resturant`);`

5.3.2 Find out the name of all the students having 'D' as the first letter in their names.

✓ `Select * from `student` where `First_Name` like `D%`;`

5.3.3 Display All the Information Of pg or hostel which has RO and Freeze both facilities.

✓ `SELECT * FROM `pg_hostel` WHERE `RO`='yes' AND `Freeze`='yes'`

5.3.4 Display university name Along With Number Of courses In Each university In Decreasing Order.

✓ `SELECT `University_Name`,COUNT(`Courses_Name`) AS 'No of Courses' FROM `courses` GROUP BY `University_Name` ORDER BY 'No of Courses' DESC`

5.3.5 Display student full name and email id whose age is between 18 to 20.

✓ SELECT `First_Name`, `Middle_Name`, `Last_Name`, `Age`, `Email_ID` FROM `student` WHERE `Age` BETWEEN 18 AND 20

5.3.6 Give a Boys hostel name whose rent is less than 100000

✓ SELECT `PG_Name`, `PG_Address`, `Room_Number`, `Owner_Address`, `Owner_Contact`, `Rent`, `Type` FROM (SELECT * FROM `pg_hostel` WHERE `Type`="Boys") WHERE rent<100000;

5.3.7 Print name of the students who studies in GMIT from branch IT.

✓ SELECT `First_Name`, `Middle_Name`, `Last_Name`, `Email_ID`, `Contact_Number`, `University_Name`, `Degree`, `Branch`, `Sem`, `Gender` FROM (SELECT * FROM `student` WHERE `Branch`="IT") WHERE `University_Name`="GMIT";

5.3.8 Print student name whose university is located in Nadiad.

✓ SELECT `First_Name`, `Middle_Name`, `Last_Name` FROM `university` INNER JOIN `student` ON university.University_Name=student.University_Name WHERE `Location`="Nadiad"

5.3.9 Give the name of the student along with their community name.

✓ SELECT `First_Name`, `Middle_Name`, `Last_Name`, `community_Name` FROM `student` RIGHT JOIN
`member` ON student.S_ID=member.S_ID WHERE 1

5.3.10 Print student name from where they buy stationary items.

✓ SELECT `First_Name`, `Middle_Name`, `Last_Name`, `stationary_Name` FROM `student` LEFT JOIN
`stationary_buy` ON student.S_ID=stationary_buy.S_ID WHERE 1

5.4 PROCEDURES AND EXCEPTION HANDLING

5.4.1 Insert Student Data After Checking All the Validation like email ID, Phone No.

```
DELIMITER $$

create procedure StuData(IN first_name varchar(10),IN middle_name varchar(10),IN last_name varchar(10),IN
email_id varchar(20),IN age decimal(2,0),IN Contact_Number decimal(10,0),IN event_name varchar(20),IN pg_name
varchar(20),IN re_name varchar(20),IN University_name varchar(30),IN degree varchar(10),IN branch varchar(10),IN
sem decimal(1,0),IN gender varchar(10))

begin

DECLARE Counter varchar (4);

select count(said) into Counter from student;

set counter = counter + 1;

IF emuellid like '%@gmail.com' THEN
IF length (contact number) <=> 10 THEN

        IF (select count(University_name) from University u where u.university_name = University_name) then

                SELECT 'University Found' AS MESSAGE;

                INSERT into student VALUES
                (first_name,middle_name,last_name,email_id,counter,age,contact_number,event_name,pg_name,re_name,Univer
                sity_name,degree,branch,sem,gender);

                SELECT 'YOUR DATA IS INSERTED' AS MESSAGE;

                ELSE

                        SELECT 'Enter Valid Name' AS ERROR;

                END IF;

ELSE

SELECT 'Your Mobile No. is not valid' AS ERROR;

END IF;

ELSE

SELECT 'YOUR Email-ID is not valid' AS ERROR;

END IF;

        END $$

DELIMITER ;

Call StuData('Raghvendra','D','Gohil','raghav@gmail.com',18,9512100731,'BreakUP Day','Royal Care','Prime Dinning
Hall','Dharmsinh Desai','B.Tech','IT',5,'Male');
```

→ In the Student one row is Inserted.

Call StuData('Raghvendra','D','Gohil','raghav@gmail.com',18,9512100,'BreakUP Day','Royal Care','Prime Dinning Hall','Dharmsinh Desai','B.Tech','IT',5,'Male');

→ As from above query Number Format is not proper so, it will give ERROR.

5.5 FUNCTIONS

5.5.1 Show the number of Student in particular University

```
DELIMITER $$  
  
CREATE FUNCTION no_of_student(University_Name varchar(30)) RETURNS int DETERMINISTIC  
  
BEGIN  
  
    DECLARE no int;  
  
    SELECT COUNT(S_ID) INTO no FROM student s WHERE s.University_Name=University_Name;  
  
    RETURN no;  
  
END  
  
$$  
  
DELIMITER ;  
  
  
SELECT University_Name, no_of_student(University_Name) FROM student GROUP BY University_Name;
```

5.6 CURSORS

5.6.1 Show Name Of all Restaurant's.

```
DELIMITER $$  
  
CREATE PROCEDURE r1 (INOUT Name_List VARCHAR(1000))  
  
BEGIN  
  
    DECLARE done INTEGER DEFAULT 0;  
  
    DECLARE r_name VARCHAR(20) DEFAULT "";  
  
    DECLARE r_cursor CURSOR FOR  
  
    SELECT Re_Name FROM resturant;  
  
    DECLARE CONTINUE HANDLER FOR NOT FOUND SET done = 1;  
  
    OPEN r_cursor;  
  
list:LOOP  
  
    FETCH r_cursor INTO r_name;  
  
    IF done = 1 THEN  
  
        LEAVE list;  
  
    END IF;  
  
    SET Name_List = CONCAT(r_name, "-->",Name_List);  
  
    END LOOP list;  
  
    CLOSE r_cursor;  
  
    END$$  
  
DELIMITER ;
```

```
SET @Name_List="";  
CALL r1(@Name_List);  
SELECT @Name_List;
```

5.7 Trigger

5.7.1 Update Event name into Event table and Organize table using Trigger.

```
DELIMITER $$  
CREATE TRIGGER e1 AFTER UPDATE ON events FOR EACH ROW  
BEGIN  
    DECLARE v1 VARCHAR(20);  
    SELECT Event_Name INTO v1 FROM events WHERE Event_Name=NEW.Event_Name; UPDATE  
        `organize` SET `Event_Name`=v1 WHERE Event_Name=OLD.Event_Name;  
END $$  
DELIMITER ;  
  
UPDATE `events` SET `Event_Name`="Dargon Ball" WHERE Event_Name="Coding war";
```

- After Update on Event Table.

- Updated by Trigger on Organize table.

5.7.2 Delete Community Name from Community Table and Member table using Trigger.

```
DELIMITER $$  
CREATE TRIGGER c1 AFTER DELETE ON community FOR EACH ROW  
BEGIN  
    DECLARE v1 VARCHAR(20);  
    SELECT Community_Name INTO v1 FROM community WHERE  
    Community_Name_Name=NEW.Community_Name;  
    DELETE FROM `member` WHERE Community_Name=OLD.Community_Name;  
END $$  
DELIMITER ;  
DELETE FROM `community` WHERE Community_Name="DSC";
```

- After Deleting “DSC” from community table

- Deleted “DSC” from Member table using DELETE Trigger

6.Future Enhancements of the System

- We will design Front-end Design in HTML, CSS, JavaScript and Develop Bank-end in Python
- For security purpose New Registration is done using OTP.
- Outputs, methods and user data input will be lot easy after the implement of GUI.
- We will make database more consistent and We are making this database efficient and easy to implement with huge data capacity.

- Methods and user data input will be lot easy after the implement of GUI.
- We will also add some extra features so that the users can get answer for their complaints as fast as possible.

7.Bibliography

- We created the ER Diagram and Schema Diagram on MySQL Tool.
